I have just created the models using code first in visual studio (portal tables, password hashed as I don't want user passwords to be displayed on my site). I can see the model running perfectly fine on the server but I cannot find where I need to change the app pool user. Once again, it runs fine on my local box. Any help would be appreciated. A: I finally tracked down the problem and it had nothing to do with app fabric at all. It was a problem with changing the connection string from: add key="DefaultConnection" value="data source=.\SQL2008;initial catalog=etdl;user id=dbuser;password=dbpass;Trusted_Connection=Yes;MultipleActiveResultSets=true" to: add key="DefaultConnection" value="Data Source=(localDB)\v11.0;AttachDbFilename=C:\temp\etdl-db\db.mdf;Initial Catalog=etdl;Integrated Security=True;MultipleActiveResultSets=True" Then the model that was running on the local environment was not being built against the correct database. Once I made the change, the model
