OpenControl Modbus Ethernet OPC Server (OPC) is an OPC Server / OPC Client tool for Modbus communication with Modbus Ethernet Modbus Device or many other Modbus Devices. It offers an easy configuration interface, sophisticated build-in Online Monitoring and an option of updating the OPC server (server is always online) using a configuration file in the client area. OpenControl Modbus Ethernet OPC Server can be used for Monitoring I/O Devices, Tag Management, Configuration Management and many other functions. It supports a complete family of OPC Devices, including OPC DA and OPC AE and allows working with different protocols and addresses (least significant bit, most significant bit, serial or Ethernet, LSB-LSB, MSB-LSB, MSB-MSB, word, octet,...) as well as protocols, addresses, any number of devices, multiple Groups, minimum/maximum values, input/output pins,.... OpenControl Modbus Ethernet OPC Server is a multi-threaded OPC Server that supports best performance and stability at the same time. The OPC server has built-in Online Monitoring of device values, to quickly see the result of changes. OpenControl Modbus Ethernet OPC Server is an OPC Server, a modbus client and an OPC Client. It supports many protocols, addresses, multiple groups, and multiple devices and allows to communicate with a complete family of Modbus OPC Devices. Supporting Multiple Groups: OpenControl Modbus Ethernet OPC Server allows you to define multiple groups for your OPC devices. When a device is placed in a group, this group name is added to the IP address of the OPC server and is set to the connection port of the OPC server. A group name can be used to filter out multiple devices on the

same port. For example, you can define two groups of a particular OPC device to only monitor one of them and disregard the second one. Categories: 1) OPC Client 2) OPC Server 3) Modbus Client 4) Modbus Server 5) DCE Client 6) DCE Server 7) Modbus over DCE Client 8) Modbus over DCE Server 9) Modbus over Ethernet Client 10) Modbus over Ethernet Server This option is based on the C/C++ DLL with TCP/IP support, so it is compatible with all Modbus over
