TI-Nspire CX/CX  
CAS/CX/GLove Aug 10, 2004  
Ndless is a small program for. I  
have a TI-Nspire CX and I am  
trying to use the Nd

A: The first thing to do is to  
make sure you have TI Nspire  
CX software and an SD card.  
You can download the software  
free from TI.com. TI sells the  
SD card as a separate item. I  
used an old (4 gig) SD card to  
set up my Nspire CX. Also  
make sure you have sufficient  
memory (RAM) on the  
calculator. I use a TI 492 and  
can only use the programs that  
are supplied with the calculator.

You may want to add a list of the programs you have (and their status) to your question.

Q: How to access a.jar file from command line? I have a jar file.jar and I have a.txt file in the same directory. I am trying to write a java class that can read and edit that file. I have

included the file as an external class, and have tried to read and write to it but I get an error Exception in thread "main"

java.io.FileNotFoundException: filename.txt (No such file or directory)

```
import java.io.*;
import java.lang.*;
import java.util.*;
public class
```

```
JavaClass{
    public static void
    main(String[] args){
        Scanner s
```

---

```
= new Scanner(System.in);
String newFile = s.next(); File
inputFile = new File(newFile);
FileWriter fileWriter = new
FileWriter(inputFile);
BufferedWriter bw = new
BufferedWriter(fileWriter);
bw.write("hellllllllllllllllllllllll");
bw.close(); try{ Scanner reader
= new Scanner(inputFile);
StringBuilder sb = new
StringBuilder(); while
(reader.hasNextLine()) {
sb.append(reader.nextLine() +
