Vgate scan vs450 software update for vgate scan vs400. Q: How to change all options on Django admin site I have django application with many models. I want to change all options on admin site in order to change all options for this models I try to do this by changing settings.py AdminConfig = [(# Models)] and making a file called admin.py in my app, and class AdminConfig: def __init__(self, models): self.models = models for model in models: self.models.append(model.__name__) class Configuration(AdminConfig): def __init__(self, models): AdminConfig.__init__(self, models) now i tried to call this method from app.admin import Configuration Configuration.configure(Option1, Option2, Option3) but it's not working A: To override Django's Admin class, you'll want to inherit from it, and add to the base class. class MyAdmin(admin.ModelAdmin): def __init__(self, *args, **kwargs): admin.ModelAdmin.__init__(self, *args, **kwargs) self.my_admin_options = [Option1, Option2, Option3] That should be all you need. Option1, etc will be available as you do the usual admin.ModelAdmin. To see the options available, do a
