
Chicken Invaders 2 Free Download Full Version Pc Game

Control a fleet of foot soldiers with your chicken slingshot, head to the sky and fire at enemies from above. Don't fall off the edge of the map! Collect as many orbs as you can and head to the next level!

Help the Chickens! **** BUILDING CONSTRUCTION **** This game's core gameplay is focused around the building and creating of structures, and usually revolves around the use of items such as *ducks*, *mud*, *sticks*, *buttons* or *chicken parts*. You can edit the structures of your enemies as well as your own, by placing buttons and items into empty slots to create new floors, walls, and decorations. Your items can be used to make new entrances, additional exits, bridges, and more. Your items can be created by combining items together, or by collecting specific items while on a special mission. The players have a wide range of items to use, from the *duck's* down to the *eggshells*. It is your job to combine items, with the aim of constructing the highest level of structure you can. These structures can have multiple floors, walls, and decorations to build onto. You can also create items, some examples of which are: a *duck's feather*, *buttons*, *eggshells*, *sticks*, *sand*, *mud*, and *catfood*.

**** GRAVITY PIGGY'S ADVENTURE **** This game is a spinoff of Tails, a game that was released in 2011 by Alpha Bros. Gameplay for Gravity Piggy's Adventure is entirely different than Tails, though Gravity Piggy's Adventure shares the same design aesthetic. Unlike Tails, your objective is to bounce your nameless pig across different platforms, avoid enemies, and collect loot in order to upgrade your piggy. If you have Tails installed, you can play Gravity Piggy's Adventure in your browser on any device, by installing the browser plugin.

**** CHICKEN IN THE BOX **** This game is a re-imagining of the old game, Chicken Invaders. This game is very similar to the old game, however there are some differences, such as the 'Skins' system, which allows you to customize the look and feel of your characters. Using the 'Skins' system, you can create one character that looks like one of many different individuals.
