A: I suggest you download dvdshrink from an old site as there is a crack file for you there. Q: Is it possible to pass parameters to dplyr functions from outside dplyr package? I would like to do the following using dplyr and ggplot2. Since ggplot2 is not documented on CRAN, I want to wrap it within the dplyr namespace. I want to pass the following parameters from outside: a function global variables a base environment Here's what I've tried:
library(ggplot2) library(dplyr) set.seed(123) a = 10 df = data.frame(x = runif(100), y = runif(100), label = 1:100)
