Update the Metasploit Pro module database by running msfupdate.Q: Is the word "fizzy" only used for alcohol? The word "fizzy" is used for the taste of some alcoholic drinks. Is the word "fizzy" used only for alcohols or is there also another word for the "fizzy" taste of other drinks? A: No, it is not exclusively used for alcoholic drinks. I have heard the term fizzy used for a carbonated beverage such as soda. This is used the same way that you would use the word soda, to describe the taste of a soda. The dictionary definition is: carbonated drink : soda pop, often containing lime or lemon juice Q: How to change the default charset for JDBC I am connecting to a Microsoft SQL Server using JDBC 3.0 and the JDBC driver. I have defined the connection url like this: jdbc:sqlserver://xxx.xxx.xxx.xxx:DatabaseName=mydatabase;CharacterSet=utf8 However, every time I do a database operation, the data is always in a different charset. I've found several ways to change the encoding of the JDBC result, but it doesn't seem to have any effect. For example, I can use this: connection.setClient 2d92ce491b
