Scary01Diagbox7 Querying the connection's state
with mstsc shows it's closed and now it's not
available. I tried restarting the server, but the issue
remained. The exception shown in Task Manager is
this: This application has requested the Runtime to
terminate it in an unusual way. Please contact the
application's support team for more information. The
description of the exception in the Task Manager is
this: The process was terminated due to 2d92ce491b
