The primary purpose of the program is to perform an. 10. Discussions. ADAPT PT/RC. For the past 25 years, ADAPT PT/RC has been a standard. ADAPT PT/RC is ideal for the following uses: estimation of serviceability, analysis of. The House intelligence committee has subpoenaed the head of security firm CrowdStrike for documents related to its findings on alleged Russian interference in the 2016 election, three sources with knowledge of the matter told Reuters. The company has come under criticism for its findings that the Russian government hacked into Democrats' computers during the campaign, which President Donald Trump has dismissed as "a witch hunt". The chairman of the committee, Republican Devin Nunes, said on Tuesday that he had taken the unusual step of authorizing a subpoena because CrowdStrike had declined to appear. CrowdStrike did not immediately return a request for comment. The company stands to gain from appearing before the committee as Nunes plans to question its chief executive, and has worked closely with the committee since it reported that it had found evidence that the Russians had hacked the emails of the Democratic National Committee. The committee and CrowdStrike have fought over the need for additional information, with the committee having made an argument that it needs all of the information it can get to better defend its case to the public. The committee, led by Nunes, the chairman of the House Permanent Select Committee on Intelligence, has cast doubt on CrowdStrike's findings, which the company initially released last month. The White House has also questioned the findings, which U.S. intelligence agencies have publicly said were backed up by the evidence. Related: What are the Russian hacking charges worth to President Trump? Trump has faced repeated questions about his dismissal of the FBI's warnings that Russia was interfering in the election, as well as about his unfounded claims that millions of people voted illegally in the 2016 election. d4474df7b8
