IRC Bot Crack + Keygen Full Version

This is a small application that provides a command-line bot for Internet Relay Chat (IRC). It's main features are: - provide a basic functionality to user, - provide basic text only user interface and response to client requests, - provide a full command line interface and be started as a daemon. Installation: Copy the directory your want to use as "/var/lib/ircbot" to "/etc/ircbot" directory. Configure the configuration file "/etc/ircbot/ircbot.conf" manually if you need to. Then, add a new user in /etc/ircbot with a unique nick. Adding users: The users' list will be located in /etc/ircbot/users.conf file. Here, the file format is exactly like /etc/passwd file format. The first column will be the nick and the second column will be the user. File example: 25 admin 26 user 27 other Examples: To add a new user "user" with a unique nick: ircbot -u user -n user To add two users and have their first column's value start from "0", use the following command: ircbot -u user -n user -d 0,0 To add three users with user ids 0, 1, and 2 and have their first column's value start from "0", use the following command: ircbot -u user -n user -d 0,0,1,1 Note that users can have more than one nick. Startup of the application: You need to add a startup script to /etc/rc.local Add following lines at the end of the file: su -s /usr/bin/ircbot -c "/usr/local/sbin/ircbot -c ircbot.conf" The commands like su, su -s, etc. are needed to run the startup script as the "root". Daemon startup: You need to create a startup script to run the daemon. To start the daemon, follow the following syntax: /usr/local/sbin/ircbot -c ircbot.conf Please note that the daemon must be started as "root" user. Example: su -s /usr/bin/ircbot -c "/usr/local/sbin/ircbot -c ircbot.conf 09e8f5149f

IRC Bot Activation Code Free

IRC Bot is a very lightweight package that was especially designed to provide a functional Internet Relay Chat bot that is deployable via command-line.
