This dashboard software is able to run on PC's running Windows XP through Windows 7 and Mac OSX. This dashboard software is developed by Car Design Studio, a company whose main goal is to create the best sim car dashboard software. They have countless industry awards to show proof of their success and dedication. Their newest release of the Z1 Dashboard software was named the 2018 Z1 Dashboard Design Awards winner. The award indicates that this software was one of the most highly recommended and sought after software programs for sim car dashboard design. With this awesome software, you can easily design your own custom dashboard that is best suited for your ride. You can either manually design your dashboard with the help of the software or you can use their built in design wizard. The final product is sent to you via email within minutes of you submitting the design. Here are some of the new features with this software. 1. This software has
