Raku PhotoBook Full Version Free [32/64bit] (April-2022)

Raku PhotoBook is a handy utility that was designed in order to help you easily make your own personalized photo albums in no time. It is very simple to use and highly customizable. What's New in This Release: • Fixed a bug where the Lava layout wasn't correctly displaying all the content of the image • Changed the Lava layout to fit the wider screen width • Resized all the graphics to fit the new layout • Fixed a bug where the pageCount field was showing "1" when there was more than 1 page • Fixed a crash with the show page action

An add-on for professional photo book makers, Image Server and Project Server. The Raku PhotoBook is a highly customizable tool that allows users to easily create their own photo books from the images in their Computer, Local hard disk, Web galleries, and even from their Office SharePoint Server 2007 Enterprise Edition (O365) deployment. Now there's even more power and functionality in Raku PhotoBook that makes it an indispensable tool for any photo book maker.

Create and Save Scanned Image Folders The first time you create or open a project, Raku PhotoBook will create a folder on the users local hard disk and image server to store all the images you scan. After the first time you save a project the image server location will be copied to the users local hard disk.

Set Scanned Images to Automatic Creation Raku PhotoBook can create scanned image folders on users local hard disk and image server. Once the first project has been created or opened and the images have been scanned, you can set the scanned images to automatically create scanned image folders.

Create Saved Projects from Scanned Images Another added feature in Raku PhotoBook is the ability to save a project that was created from scanned images and they can then be reused as new projects are created. Select the Scanned Images Folder

A handy feature is the ability to select the scanned images folder, so you can just select that folder in Raku PhotoBook and the project will start to create the project from the images in that folder.

Shared Projects You can create a shared project in Raku PhotoBook that can be shared and opened by multiple users at the same time.

Layout Templates There are several layout templates in Raku PhotoBook, including horizontal, vertical, and lava (with and without image label).

Printing There are several options to print and export the projects,

What's New In Raku PhotoBook?

PhotoBook Raku PhotoBook can help you to create a photo book (or wallchart) in no time. Just insert the images that you want to show in your photo book and the result is shown immediately in a portable, printable form. No HTML knowledge is required. The main features are: --Automatic creation of --Inserted images are resized to fit the page. --Print your book. --Supports a variety of image formats (including: PNG, JPEG, GIF, BMP, TIF, PSD, EPS, WMF and RAW). --You can add a title to the images and choose font types and sizes. --You can create a password protected book and fill in a custom title. --If you are creating a password-protected book, you need to fill in a custom password. --There is no requirement for you to know HTML.

Installation To use Raku PhotoBook, just extract the contents of the download archive to any location where it can be found and run the raku_photo_book.rb script. Raku PhotoBook is distributed in a ZIP archive, so it is recommended to use an archiving tool such as 7Zip or WinZip. Note: If you are installing Raku PhotoBook in Windows and you are receiving a lot of error messages about the file size of this archive, you may be prompted to change the "Compressed By" setting to "LZMA (Windows)" (instead of "None" as suggested in the article).

Usage Simply run the raku_photo_book.rb script: \$ raku_photo_book.rb The script will ask you for a few options: --title=Value: Title for your book. --password=Value: Password for your book. --album_title=Value: Album name for your book. --sort_order=Value: Sort order for the images in your album. Choose between 'filename' (the default value), 'date' or 'modification date' (default value). The script will also show you the list of files that were selected for inclusion in your album. If there are no files for inclusion, the script will prompt you to add them. A few additional options can be found by typing help at the command line.

Creating an album To create an album, use the following commands: \$ raku_photo_book.rb --title=A simple photo album --album_title=A simple photo album --sort_order=Modification date --password=This is a secret password If you want to change the title, password or album name, just enter the desired values and press enter. If you want to see the list of images that are being shown in the

System Requirements:
