**SUMO Traffic Generator Purpose:** The SUMO Traffic Generator is an application that models and generates traffic on the streets of a city. SUMO Traffic Generator uses the SUMO simulation and routing engine for its functions. The modeling capability of SUMO Traffic Generator is sufficient for simulating traffic in a city environment. The SUMO Traffic Generator can simulate traffic patterns for the following:

- The city-wide average car speeds
- The SUMO Traffic Generator can also generate traffic for a small or large town.

The major functionalities of the SUMO Traffic Generator include:

- An in-house developed, graphical user interface (GUI) which is designed to be easily accessible to the user.
- The ability to simulate traffic for a single city, a city block, a street, an intersection or a section of a highway.
- The ability to export the resulting traffic data into other formats such as the PostgreSQL™ DBMS (e.g. see the instructions provided at the bottom of this document), the SUMO Traffic Simulator ( or SUMO Urban Mobility Simulator (
- The ability to import existing traffic data from files that 1d6a3396d6
