Thanks so much for your help in advance. A: The reason why the Terminal was not working was because I had another name that was already using the same python interpreter. To avoid this, I had to rename my python directory to python2.7 and I managed to solve the problem. [Combined effects of selenium compounds and phenobarbital on the animal model of selenium deficiency]. Combined effects of selenium compounds (Se-probiotics) and phenobarbital (PB) on conditions of selenium deficiency were studied in the animal model. It was established that the main mechanisms of the combined effects of Se-probiotics and PB were different. In the case of the combination of drugs, the inhibition of the biosynthesis of glutathione (GSH) in liver by PB was the most significant mechanism. The Se compounds were shown to improve the GSH biosynthesis in liver and to facilitate the PB effect, and the combined use of the two drugs was shown to produce an additive effect.Erratum to: Protein Cell (2016) 7:8 DOI 10.1007/s13238-016-0296-2 {#Sec1} == ========= The original version of this article unfortunately contained an error whereby the picture of the initial publication of key findings (Fig. 4) was not actually part of the initial submission. This was due to a duplication mistake in the processing of electronic files when the journal was made publicly available. **Publisher's Note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
