Keymacro allows you to create and manage hotkeys for any software keyboard/mouse combination. It allows you to define a key combination or a macro to perform a task in any software. It may be a keystroke, mouse button click, or even a window move. You can even create a macro to enter a password! Features of Keymacro:- Hotkey management - With Keymacro, you can easily create and manage hotkeys for any application in your system. Macros - If you use a keyboard/mouse combination to complete a task, Keymacro can help you make this task faster. For example, you can easily replace a keystroke with a mouse click. Undo/redo - Undo or redo actions made with macros is easy. Password - You can easily create a password that opens a password protected program, launches an email program, loads a website, etc. Keymacro has an automatic learning feature - if you are using the same mouse/keyboard combination to run a program repeatedly, Keymacro will be able to recognize it. Keymacro has built in directory and search filtering - use filters to easily locate the files you want. Keymacro is a universal hotkey solution, so it can be used in all applications you run. It works with all software types, so you don't have to be running any type of specific software to use it. The example programs are in their free version but include hotkeys for all popular applications. Keymacro's manual (A0) and a demo (A1) version can be downloaded from its website.
