

---

Read more about this: Is utcservice.exe process dangerous? utcservice.exe Errors . high processor, which drains the battery very quickly, so it's better to disable ... Why? This process has many files. Can I disable any of them to save power? How can I disable this process I do not think there is a way to disable a process to save power. But you can stop some processes from using the CPU, you should know which processes are using the CPU. Then remove those processes from the task manager. I recommend to read here: <http://support.microsoft.com/kb/919302/en-us> Thanks for your reply, but I have a problem with this.
