That's one way to go, I suppose. It's certainly possible that Naruto will eventually end up in a red-colored version, though I doubt it. In addition, I'm still wondering how this particular release will deal with the character's attire, considering that she's wearing a red Naruto shirt. It would seem that, in this character's case, even if it would be a while before she actually ends up in the franchise, a future release could still affect her current appearance. At least, that's what I'm hoping. In recent years, a technique to display electronic circuit diagrams is implemented by using a so-called Web site. This technique enables users to browse circuit diagrams (simulation-based diagrams), which are stored on the Web site, in a state of being on the Web site and in a state of being edited, for example. In addition, a technique to convert electronic circuit diagrams, which are edited by using a Web site, into an assembly language file, and to display the resulting assembly language file in an editable state has been proposed (e.g., see Japanese Laid-open Patent Publication No. 11-83589).
