A small issue of this plugin is that it only allows you to work with one of the two programs at a time.

We all know the Starbucks baristas who are quick to answer “yes” to your order for a “Vietnamese Americano.” It turns out they have a name for it. It’s called a “Vietnamese Americano.” One Starbucks employee even has a list of terms to use when a customer asks for a “Vietnamese Americano.” It’s all because Starbucks stores in the U.S. now sell a menu item that refers to itself as a “Vietnamese Americano” — and the terms are so widespread that a website has been set up to list them all. This is the website: nametags.com/vietnamese-american. The website states that when customers ask for a “Vietnamese Americano,” they should be told “it’s named after my family,” or “it’s pronounced ‘Van,’ not ‘Van,’ and it’s usually made with Vietnamese coffee, Americano, a splash of skim milk, and a dash of ice.” Customers can even come up with their own version, writing them down on the website for future reference. They’re on Facebook too. They also have recipes for the beverage and even a link to a handy “Vietnamese Americano” class at Stanford University in California. We all have a few such terms, including “chai
