WORLD TIME

WORLD TIME is a lightweight software application whose purpose is to help you check out the time for 12 cities or countries around the world from a single panel. Portable tool You can take advantage of the utility's portability status and run it on the target system without having to go through an install process. You simply need to double-click on the executable file. Uninstalling it can be done with the aid of a deletion task of the files that you have downloaded from the Internet, so you do not need to appeal to specialized uninstallers. User interface The GUI looks a bit crowded because the program integrates all of the supported clocks directly in the main window. There are no settings for disabling and closing some of them so you are stuck with the preset options. WORLD TIME reveals information about the name of city, digital clock with the time displayed in hours, minutes and seconds, day of the week, as well as flag. A help manual is included in the package and contains short descriptions about the tool's capabilities. Configuration settings WORLD TIME offers you the possibility to click on any clock in order to make it a reference to all of the others. Based on a user-defined selection of a city/country, the time is automatically adjusted for all the other locations. What's more, you are allowed to change a particular city with another one. You can choose between a multitude of predefined cities or countries, such as New York, France, Finland, Italy, Japan, Romania, Russia, Spain, Honk Kong, Los Angeles, Tokyo, and Germany. Other important configuration options worth being mentioned enable you to alter the time for each location, change the names of the locations, save the current cities/countries and settings so the program can load them automatically, and restore settings to the default ones with a single click. Conclusion All things considered, WORLD TIME provides a simple software solution for helping you monitor the time for different locations, and can be handled by beginners and professionals alike. You can download WORLD TIME for Windows 7, 8, 10, 8.1, and Mac OS X (10.9 Mavericks, 10.10 Yosemite, 10.11 El Capitan, 10.12 Sierra) from Softonic.
