Workbenches AutoCAD supports the following Workbenches. Printing and Bookkeeping AutoLISP AutoLISP is a dialect of Lisp implemented for AutoCAD and used

by many AutoCAD-based programs. It is used by the following applications: AutoLISP is also available for some third party languages that create their own plugins. AutoLISP is also used in other software, including Freehand Graphics Software's SmartDraw and Intergraph's RGF. Autodesk Exchange Apps (AEA) is a workbench created by Autodesk to provide a GUI for their plugins to automatically set up, update and maintain their plugins' properties. Visual LISP Visual LISP is a graphical programming language that

is a direct port of the LISP language. VBA Visual Basic for Applications (VBA) is a general-purpose programming language used for Microsoft Office applications. It is similar to Visual LISP, it can be used to create macro functions. Autocad JavaScript Autocad JavaScript is an object-oriented extension to Visual LISP with a syntax similar to JavaScript, such as loops, inheritance and polymorphism. History AutoCAD 1982–1990 AutoCAD, initially known as AutoCAD-BASIC, was released for MS-DOS on 16 January 1982. It was based on base

language 3.0, created for ICAD, but was not implemented properly, which resulted in some bugs and limitations, such as having a fixed "grid paper" width. However, it was clear that the product's future lay with object-oriented programming. In 1982, AutoCAD was compatible with a range of drafting platforms, including CADDIES for the Macintosh, the Micro-Part and the S-100 bus. In 1989, CAD Software Inc. was purchased by AutoDesk, later known as Autodesk, and it produced a version called AutoCAD which was also available on Amiga,

Atari, Macintosh and CP/M. In 1990, the entire CAD product line was renamed and the product line was further expanded with various releases (e.g. AutoCAD LT and AutoCAD 2000) and version numbers (e.g. AutoCAD 3D, AutoCAD R14). AutoCAD

1991–1994 In 1991, AutoCAD continued to develop rapidly
