Default limits and maximum scan size changed in Fireware v12.0.1. When you upgrade Fireware OS, the Gateway AntiVirus scan size limit does not affect the storage type you select. For most repositories, this can be a big problem. If you want your Gateway AntiVirus gateway to run in maximum scan mode and not just in minimum scan mode, you need to use the default settings. Once you have configured your firewall, you must include your Gateway AntiVirus in your firewall. In most configurations, your Gateway AntiVirus runs in minimal scan mode after activating the default settings.
