Note Most of the tools in Photoshop are located on the Toolbar. You can also access the Toolbar from any of the Tool windows. If the Toolbar is not visible, then go to the Window menu and click the one that says _Customize Toolbar._ Each tool has its own preview box. You can use this box to see what the effect of your tool will look like before you apply it. When you apply an effect to an image, this box doesn't disappear, and its contents are still there to guide you until the tool has finished processing the image. You can drag the box around the image. If you release the mouse button, the box returns to its original position. * **Blending Options** : This is where you can choose how the edges of an image blend together when you use one of the blending modes. * **Layer Styles** : Layer styles are different types of effects, such as textures, reflections, and so on, that you apply to layers. They're also used in some of the effects covered in this chapter.
