MMI Desktop Launcher

MMI desktop launcher is an interesting piece of software that provides similar functionality to the Mac OS Spotlight feature, except it is specifically designed for launching apps. It is very convenient and easy to use, as well as unobtrusive. You can create shortcuts for your favorite apps and arrange them in an accessible manner, but often the simplest way to find and launch the program is just to type its name. MMI desktop launcher is an interesting piece of software that provides similar functionality to the Mac OS Spotlight feature, except it is specifically designed for launching apps. It is very convenient and easy to use, as well as unobtrusive. Handy app launcher that is only a hotkey away The application works like this: upon using a key combination, which is fully customizable, a search box is displayed on your desktop, and you can just type the name of the application you wish to launch. Customizable app that can even help you open web pages While most of the applications available on your PC should be detected automatically, you can define additional folders where the program should look for executable files. Additionally, it is possible to set up aliases in order to find and launch various apps more quickly, as well as create shortcuts for websites and launch them easily in your default web browser. Personalize the app's UI and find the perfect hotkey MMI desktop launcher offers two color themes for you to choose from, and you can also change the window's opacity. Moreover, the search box can be moved to any position on your desktop. If you don't find the default hotkey to be particularly convenient, you can change it at any time. Pretty much any key combination can be used, so it shouldn't be too difficult to find the right one. In conclusion, MMI desktop launcher is quite an impressive application, providing you with a quick and simple way to launch applications and open websites. It can be customized to a great extent, and it is remarkably easy to use. Microsoft Teams - Office 365 integration - From Slack to MSPulse, users in the Microsoft Teams group benefit from a variety of communication options Microsoft Teams is a new application from Microsoft, incorporating many of the features of Microsoft Teams Chat, Microsoft Teams Direct, Microsoft Teams Video and Microsoft Teams Mail. The Microsoft Teams application can be accessed at from any browser.
