Microsoft Visual Basic for Applications is a development environment for Microsoft Windows. It is part of Microsoft Visual Studio. Microsoft Visual Basic for Applications uses the VB scripting language, but is not closely related to other scripting languages such as AppleScript, JavaScript, Perl, Python, and Ruby. It is a means of extending the functionality of Microsoft Office, and creating programs that run on Office. AutoCAD Architect AutoCAD Architect is a software engineering environment for Autodesk software products. AutoCAD Architect is part of Autodesk's Software Development Studio (SD Studio) suite of tools, and is designed to help non-developers create plug-ins to extend the functionality of AutoCAD, especially AutoCAD LT. A plug-in is also called a plug-in project or a plugin project. AutoCAD Architect provides a set of features and tools to increase the productivity of AutoCAD LT, AutoCAD Map 3D, AutoCAD Civil 3D, and AutoCAD Web 3D users. AutoCAD Architect contains a high-level design environment, compiles the project for the Windows platform, and generates a set of files that can be installed on users' computers to enable the plug-in to work on their installation of Autodesk software.

AutoCAD Architect is designed to make it as easy as possible for users to create a plug-in for AutoCAD. It includes tools for creating software components, creating classes, customizing the user interface, creating automation, creating event handlers, creating and saving layouts, and testing and debugging plug-ins. The AutoCAD LT plug-in system also uses the Autodesk runtime, which can be used to allow plug-ins to control a variety of functions, including customization options and collaboration. In February 2012 Autodesk released AutoCAD Architect Version 2, with many new features, including a graphical user interface, brand-new component libraries, support for scripting via the .NET Framework, the ability to work with custom editors, and support for multiple toolbars at once. Standalone The standalone version of AutoCAD includes various plug-in programs, such as: The Autodesk Exchange Apps are a community-driven collection of AutoCAD-based add-on applications that enable users to automate processes in the field of engineering and construction. The Plug-in Authoring Tool (PAT) is a tool that allows AutoCAD a1d647c40b
