Category:2001 albums Category:Post-rock albums by English artists Category:Om band albumsQ: How to define the output directory with MinGW-w64 and GNU sed? I'm working on an old project of mine that uses a Makefile that looks something like this: CC=gcc # Set includes, libraries, and linking to GNU sed GNU_SED_INCLUDES="-IS\$(srcdir)/gensed -IS\$(srcdir)/genlib -IS\$(srcdir)/genhtml" GNU_SED_LIBS="-lgenlib -lgenhtml" # Set the compiler and linker flags CFLAGS=\$(GNU_SED_INCLUDES) \$(GNU_SED_LIBS) # Set the output directory OUTDIR=\$(CURDIR)/gensed # Determine the objects and the linker command objects=gensed.o genlib.o genhtml.o # Construct the linker command LINK=\$(CC) \$(CFLAGS) \$(GNU_SED_LIBS) -o \$(OUTDIR)/gensed \$(objects) # Run the linker \$(LINK) Everything works, except that I don't know how to change the OUTDIR so that the compiler uses the gensed.o file that is produced from genlib.c So far, I've tried setting the OUTDIR to a directory that I have and containing a gensed.c file. Neither works. If I leave it empty, the compiler produces the linker error /usr/bin/ld: cannot find -lgenlib How do I do this? Edit: I'm using a Windows machine if that makes any difference. A: The OUTDIR must not be set by hand, but instead, in the Makefile. This makes sense when you think about it. If the source files have an OUTDIR, they probably want to produce something, right? But the Makefile is not a program, but an interface that translates your program's demands into commands. So, it can't know where to put output files by itself. Makefiles are also very specific. They assume that the OUTDIR is always defined to be the same.

Association between the presence of stress-related parameters and health-related quality of life in patients with obstructive sleep apnea syndrome: effects of snoring. The aim of this study was to examine the relationship between health-related quality of life (HRQoL) and stress-related parameters in patients with obstructive sleep apnea syndrome (OSAS) and to determine the effect of snoring. One hundred and seventy-five patients (87 men, 88 women) diagnosed with OSAS and without other coexisting diseases were enrolled. The impact of OSAS on HRQoL was measured with the Medical Outcomes Study Short Form-36. HRQoL was found to be lower in patients with snoring than those without snoring. In addition, sleep efficiency was also found to be significantly lower in patients with snoring. The present findings showed that snoring may be a useful diagnostic indicator in OSAS patients. As a result of its relation to HRQoL, snoring may be a useful prognostic indicator in OSAS patients.

Q: SQL Aggregate - Sum count per month I have a table that looks like this: I would like to have a list of the most occurring months where the number of values equals the total number of values, regardless of the type of value (for example, if I have a sum of 3, and a total of 100, and 100 values are equal, I would 4bc0debe42
