Mobile apps AutoCAD LT mobile apps include: AutoCAD LT 2013 for iPad and iPhone AutoCAD LT for Windows Mobile AutoCAD LT for Windows CE AutoCAD LT for Android AutoCAD LT for Windows Phone AutoCAD LT for Blackberry AutoCAD LT for Android AutoCAD LT for Android platform In addition, AutoCAD LT

allows building and running AutoCAD applications using Android platform. For example, using Android Studio it is possible to create an application that accesses AutoCAD files, or that can be embedded in a mobile application. AutoCAD LT Studio is integrated with the Android Studio and enables a user-friendly interface for Android developers. Accelerated graphics processor (GPU) AutoCAD LT can also be used to generate DXF, DWG and PDF files at high speed. This is accomplished by running AutoCAD LT in the GPU mode, which is supported by several contemporary graphics processing units (GPUs). To enable

GPU-based rendering in AutoCAD LT, users must install the external DLL. To run AutoCAD LT GPU, users must add the “GPU” mode to the DXF file. The latest version of AutoCAD LT allows the user to set a performance level in the DXF file, to control the number of polygons used to draw the model. The following table shows the current AutoCAD LT GPU rendering performance when used with the latest DXF files. AutoCAD LT on Android In late 2014, AutoCAD LT was released for Android tablets and smartphones. This was followed by a full release of AutoCAD LT Android Studio on November 21, 2014. AutoCAD LT is

supported on Android 4.1.x and up. AutoCAD LT for Android is available on Google Play. AutoCAD LT for Windows Mobile AutoCAD LT for Windows Mobile is based on .NET technology and provides support for developing native applications for Windows Mobile. As of 2016, it is no longer available to purchase. AutoCAD LT Architect AutoCAD LT Architect is an add-on to AutoCAD LT for Windows Mobile which provides the ability to produce functional deliverables for architecture, landscape architecture and planning, including floor plans, architecture, blueprints and drawings. Architect supports

applications that support existing design

Update 6:00 p.m.: The zoo is taking no chances and closed down for the next three days, a move that means the animal won't be able to go out for quite a while. The zoo's Twitter account said the animals are safe and provided an update on the breeding strategy. "We are considering all options, including reducing the

reproductive rate of some animals, to ensure the health and safety of all giraffes," the tweet said. "At this time, no decision has been made about the future breeding of the giraffes at Zoo Atlanta." Original story: The Savannah Zoo has lost its beautiful but potentially very dangerous giraffes after two of them died, zoo officials said. "Both of the giraffes we lost were part of our breeding program and it is a blow for the zoo and all of us involved," said zoo spokeswoman Megan Fox. "We have lost one calf and we lost another calf that was very close to being born." Fox said she could not discuss specifics about the animals, because of

confidentiality restrictions. But she said no additional giraffes have been born at the zoo in more than a week. "Anytime a young calf dies in a conservation breeding program, it is devastating," she said. "But we have the strongest herd management in the country and have come out with a strong breeding program in the past." Giraffes can cost up to \$5,000 each and are subject to the same health, diet and habitat standards as lions and tigers, said Sarah Kiely, a zoo spokesperson. "The issues we are dealing with are things like cystic fibrosis and heart problems," Kiely said. "Anytime we have a problem with one animal we are going to have to take

steps to ensure that we have the best care we can give them and we are doing that." The zoo says it is taking steps to boost the herds. It also removed the giraffes' access to outside food and water to reduce the risk of illness. "The decision was not taken lightly," Kiely said. "We want to
