**Lens Correction** One of the best tools available for the creation of images with a professional look, Lens Correction applies correction of optical distortions and pincushion and barrel distortions. The powerful distortion editor analyzes the image to determine distortion and perform horizontal and vertical transformations. It is possible to create an image with different magnification, apply color correction, apply a lens distortion and resize the image in any angle. Lens corrections are available in a similar manner as the Lens Correction filter in Adobe Lightroom, or Photoshop, but are generated directly in the project. It works with CMYK and RGB images.

**Background Blur** After several years of development, Adobe implemented the Background Blur feature in PS Elements, which is available only in PS Elements 11. The Background Blur filter creates a background blur to any layer, including the background or foreground. This is an useful tool for creating images with a blurred background, especially in images with a bright, overcast sky.

Students have been instructed to stay away from the premises until further notice. The activity was reported to the police KOLKATA: A parent of a student injured in a fire incident at the Kolkata School of Art & Technology (KAST) is pressing the school administration to hand over the management to her. The incident took place after the students were not allowed to elect their captains. Students had used a large blowlamp as a prop and some candles. The parents want the school to hand over the management because they feel they are the ones who are liable for the negligence of the school. "For the first time in my life, I have not received any apology from the school administration. Neither the teachers nor the students have been fired or even placed under suspension," Iain Thomas, a mother of a KAST student, told TOI. She also demanded that the school handover the management to her. "If the authorities feel that this is a serious matter, they can take measures to file a case against the principal. Unfortunately, the administration did not handover the management to me and would not even apologise. I have not even received a written apology from the school administration," Thomas alleged. Thomas has been trying to get in touch with the school since Monday. The students have been advised to stay away from the premises until further notice. "We do not feel safe with the students in the school. If the school administration has to handover the management, they will have to fire the principal, teachers and students, as they are all responsible for this incident. An investigation is on and we hope to receive some answers soon," Thomas said.

In a letter addressed to FCC Chairman Julius Genachowski, Thompson said the public needs to know what's going on in the room. "The administration is making every effort to shield itself from the public, especially as it relates to its illegal war in Iraq and on other issues," said Thompson, who represents the 9th District of California. If the public can't see the meeting they can't see it for themselves what's going on," he said. Genachowski says the meetings with the private sector have already been made public. If
