AirPods Pro is the world's most popular wireless earbuds. And now, we're also releasing a wireless AirPods charging case. It allows you to charge your AirPods without wires, and eliminates the need to buy a separate charging case. AirPods Pro The AirPods Pro wireless AirPods case sports a rotating lid that helps you charge your AirPods by exposing the charging coil to the magnetic field of your phone. This keeps your AirPods always charged even while they're in your ear. You can adjust the rotation speed of the lid. Hands-free calling and music The AirPods Pro wireless AirPods case supports hands-free calling and music on your iPhone or iPad. You can answer calls, adjust your music or pause/play songs through the built-in earphones. You can even do this with other Bluetooth devices. Magnetic connection The AirPods Pro wireless AirPods case features a magnetic connection to keep your AirPods tightly in place even when you take them out of the case. Superior magnetic effect The AirPods Pro wireless AirPods case and AirPods have been constructed of high-grade materials to ensure that the magnetic connection is more secure. This ensures that your AirPods stay put. Comfortable earbuds The AirPods Pro wireless AirPods case is made with high-grade stainless steel and aluminum for a secure connection. This case can be used for a long time without any fatigue. It's also both scratch- and water-resistant. Made for iPhone XS Made for iPhone XS and XR, the AirPods Pro wireless AirPods case supports Apple's new W1 chip technology and features up to one-meter wireless range. It also supports the touch ID of the iPhone XS/XR. Placement detail: – The charging case is available for both left and right ear. – Battery level: The battery level can be indicated with an LED, and can be adjusted in a range from "Fully charged" to "Low battery." – The case is housed in a protective cover that easily fits in the pocket of your pants or jacket. – The case can be folded back into the charging case when not in use. – You can wear the case around your neck while using the earbuds. – You can

Wi-Fi Protected Setup (WPS) is a standard for configuring Wi-Fi networks through hardware without Internet access. It is implemented in most devices using the HomeRF Alliance profile, and is becoming increasingly popular because of the convenience of setting up a wireless network without a router. However, security problems with WPS have been discovered, such as its vulnerability to a "man-in-the-middle" attack. It also supports unencrypted Wi-Fi networks, and it has been shown that an attacker can retrieve login credentials from a victim device through this method. This guide will explain how to use WPS in a secure manner. What is WPS? WPS is a standard for configuring a wireless network through a user interface without access to the network's IP address. For example, you can set your Wi-Fi network in your router using the button shown in Figure 3. When the Wi-Fi network is configured, a QR code is displayed on the device.
