What's New In?

'Java has been widely deployed as a reliable and high performance implementation of the standard programming language and its recent inclusion in JDK 7 marks the end of Java 6 era. It is the first version of JDK to be available for both Linux and Windows platforms. It has been designed to provide an excellent development experience for Java programmers while at the same time reducing the resource consumption, making it possible for developers to create Java applications that will run on any x86 and x64 platform. In this course you will learn the key fundamentals and features of Java 7 in a simple, step-by-step tutorial format. After completing this course, you will be able to write programs with the Java language that make use of all of the Java 7 language features. By the end of this course you will have: Understood the purpose of the Java language Developed skills in Java 7 language features. Understood how to use Java 7 language features. Taught you how to compile, debug and test Java 7 programs. Applied the basic principles of object-oriented design.'

Business accounting with MYBOS accounting, small and medium-sized businesses in particular, want to support all aspects of accounting. They want to be able to keep track of their cash flow, sales, and costs. MYBOS is a program that allows you to quickly start processing your business operations. Using its intuitive interface and basic tracking, you can start processing your business operations without having to perform an exhaustive database update. If you are running a small or medium-sized business, the main purpose of MYBOS accounting is to collect and process transactions. This includes collecting and processing financial data, maintaining a customer database, processing transactions and generating profit and loss reports. Clean, modern interface to quickly get you up and running First of all, you might want to know that the application requires .NET Framework to function, but it's delivered as a default feature in modern Windows iterations, so there's a pretty high chance it's already on your computer. The visual design feels fresh overall. It's fitted with high-quality textures and fluid animations for the majority of actions you perform. A side panel lets you comfortably navigate through the variety of management categories, while direct editing is done in the rest of the space, which transforms accordingly. No mandatory initial data input or history setup The application boasts a quick business setup, because unlike most accounting applications out there, this one doesn't force you to provide all input first such as opening balances, chart of accounts, tax variables, or financial year. On the bright side of things, you can start to issue invoices as soon as you launch the application, and add all necessary details along the way. This cuts an incredible amount of initial setup time, but it doesn't
