Description Bytescout BarCode Generator SDK provides you with a set of programming components for both desktop and web applications. As its name suggests, it is meant to be used by developers who wish to enhance their software with barcode generation functions. The package includes multiple types of components: Windows Forms controls for Winforms applications, WebImage controls and SSRS controls for ASP.NET, as well as non-visual .NET and ActiveX classes for generating barcode images instantly. It supports a broad range of 1D, 2D and GS1 barcodes, such as Code89, ISBN, Aztec, PDF417, DataMatrix and QR code. Parameters like the font type, font size, foreground and background colors are adjustable. Bytescout BarCode Generator SDK makes it possible to export generated barcodes to EMF, JPG, PNG, GIF or TIF images, and it is also capable of adding barcodes to PDF documents without requiring additional software. Numerous source code samples are included in the downloadable package, and you can take advantage of the purpose-built sample browser in order to view and run them. The examples cover all the supported languages and platforms, and they showcase each component's capabilities so as to make it easier to understand

#### What's New in the Bytescout BarCode Generator SDK?

Bytescout BarCode Generator SDK provides you with a set of programming components for both desktop and web applications. As its name suggests, it is meant to be used by developers who wish to enhance their software with barcode generation functions. The package includes multiple types of components: Windows Forms controls for Winforms applications, WebImage controls and SSRS controls for ASP.NET, as well as non-visual .NET and ActiveX classes for generating barcode images instantly. It supports a broad range of 1D, 2D and GS1 barcodes, such as Code89, ISBN, Aztec, PDF417, DataMatrix and QR code. Parameters like the font type, font size, foreground and background colors are adjustable. Bytescout BarCode Generator SDK makes it possible to export generated barcodes to EMF, JPG, PNG, GIF or TIF images, and it is also capable of adding barcodes to PDF documents without requiring additional software. Numerous source code samples are included in the downloadable package, and you can take advantage of the purpose-built sample browser in order to view and run them. The examples cover all the supported languages and platforms, and they showcase each component's capabilities so as to make it easier to understand how they can be used to enhance the functionality of your applications. Usage: Add a new item in the Add Reference dialog window, select Bytescout BarCode Generator SDK and click OK. Then, you can use this component in your own .NET or Visual Basic applications. The component package includes multiple application examples. See the usage section in the Component Description to get started.
