Trance Philosophy Player

Trance Philosophy Player is a handy and reliable application designed to play trance music from TFB Radio. The utility sports a simple user interface and features a play / resume function, as well as a slide for adjusting the volume of the sound. The first thing you see when you launch Trance Philosophy Player is a title screen showing the name of the track, the genre, and the recording date. All of this information is needed to play the track. The information for a track can be found in the TFB Database. If you are new to trance music, click on the "Select" icon to browse through the various categories that TFB has compiled for this purpose. Browse to "Choose Genre" and select from the list of generic categories. If you don't know what you're looking for, this will give you a chance to choose the category that best fits your style. If you are ready to play a specific track, then click on the play icon to the left of the "Select" icon. This will launch the track into playback. If you find the song doesn't start immediately, this is because you need to wait for the last track to finish before you can play the next one. The "Select" icon allows you to change the genre of the track, the song position, and the radio station. By using the "Slide to the left" you can easily adjust the volume level. Trance Philosophy Player is a simple utility that is designed to play the music you want, no matter where you are. Trance Philosophy Player is a handy and reliable application designed to play trance music from TFB Radio.
