\* \*\*The tools\*\* . Photoshop has several tools of which they are commonly used. The most used editing tools are the \*\*Marquee\*\* tool and the \*\*Hue/Saturation\*\* tool. \* \*\*The rulers\*\* . The most used feature of Photoshop is the ruler. The color bar at the bottom of the screen provides information about how a color will appear in the image you're currently working on. The color wheel in the upper right shows all the colors you have in your palette and is a good way to choose colors if you don't have a large palette. There is also a selection tool that allows you to select a portion of an image. It is more useful for resizing and cropping; however, it will be covered in the cropping section. The key selects a color in the image. \* \*\*The image editing\*\* \*\*window\*\* . This is the window where you create new images. You can create new

images by opening them or by cropping or transforming images. You can delete the image you're working on at any time by clicking the trash can icon in the lower-right corner. \* \*\*The History list\*\* \*. The history list lists the actions you took during the editing of an image. If you accidentally click in an area you did not mean to click, you can simply go back to the last image with the History menu and hit the backspace key to undo the last change.
