The new Player Impact Engine (PIE) scores real-time, in-game reactions on the pitch, like headed shots, big saves, blocked shots and many other real-life features, creating a deeper and more authentic feel. FEATURES Player Impact Engine (PIE) – Players are more connected to the ball and the action on the pitch. As gamers progress through the action, more data is collected and more details are added to player models, increasing realism and fidelity. Over time, PIE makes the game more immersive, more responsive, and more absorbing with every passing minute. In-game, changes to players’ skills and attributes that impact gameplay are made in real time. When players improve their skills with Experience Points (XP), these skills grow in real-time, allowing gamers to feel the difference. More XP can be earned by playing longer and completing match objectives, getting assist XP and collecting XP for goals. Opponents react to possession and control challenges based on their rating. As the game progresses, players have success or failure with mental and physical challenges. A new “RUMOURS” system tracks players’ performance and earning ability from the season before. Gamers can now learn from the coaches, scouts and fans about their player’s attributes, performance, and how they’ve been performing throughout the season. New live TV matches streamable on Twitch and YouTube. Live events can also be streamed and archived on the EA SPORTS Football Club. Physically-based visuals deliver a more realistic feel to the game. The game’s first major update introduces over a hundred all-new plant-based materials, giving players a more tactile gameplay experience. New colors and visual effects, plus bleeding, reflection and environmental scattering, bring the game’s visuals to new levels of fidelity. The new way of rendering the grass is just one example of the game’s advancements in realistic visuals. The biggest change in gameplay is the use of HyperMotion technology. The game was designed with the new motion capture technology in mind, using the insights and data collected during the upcoming FIFA World Cup. The new technology adds motion capture data collected from 22 real-life football players, which includes acceleration, movement and position on the pitch. This data is used to power gameplay, which is more responsive, immersive and powerful. The HyperMotion feature is not just limited to

FIFA 22 introduces fundamental gameplay advances, like overhauling the “Crowd Cheats” and “Headshots” systems, and a new season of innovation in every mode. Key Features: The Journey Powered by Football New Generation – Football In FIFA 22, we’re focused on creating the very best authentic football gameplay experience – that means every decision you make, from the way you dribble the ball to the way you kick it, can be made from the heart of the game. We’ve designed a number of new moves that combine the speed of modern, cutting-edge ball physics with the timing and unpredictability of real-world football. Together, these features – and much more – bring to life the emotional connection of playing football and the beauty of its passing, shooting, tackling and dribbling. Watch Your Success Cinematic Camera Angles It’s no secret that football is rarely played with just your feet – and just as in life, there is no “right” way to score a goal. That’s why we’ve added a new camera system to FIFA that better reflects the variety of shots that players make and ultimately mirrors the on-field experience bc9d6d6daa

What's new in Fifa 22:

- Career Mode

FIFA 22 Player Performance Technology, which is essential to the game, is used to power FIFA 22 real-life players. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. The feature was created from data collected by players in high-intensity football match to determine optimal offensive, defensive, and special football poses.

Hyper-realistic gameplay with Player Presence is inspired by real life football. The immersive way in which FIFA simulates player awareness of each other in game creates strong emotional connections between the digital characters you team up with, making each opponent a real and compelling presence on the pitch.

Find a FUT Club

- Football fans will have more choices and more success when choosing their rivals. Rivalries are now more important and will affect your rivals’, club’s success. Gone are the days when fans would be happy just to find the team with the most points. FIFA 22 gives football fans the opportunity to create their dream FUT club, and then play out every emotion from rivalry to defeat.
- An extensive customization toolset has been expanded, reflecting the diversity of customisation options in real-life. With a range of eye-catching kits, customized kits, bespoke boots, stadium modifications and more, you can make your FUT club unique.
- The ability to personalize shirts and use your phone to design your own kits and assign a customized appearance to your player is a valuable addition to a personal FUT club.
