The buzz in the soccer world last week was the news that English Premier League club Chelsea was taking a look at signing Colombian striker Radamel Falcao, the number one striker in the world at the moment. The move should be seen in terms of a club-record breaking contract, although the club has yet to release any details of the deal. If the speculation is true, the Colombian international will jump from Monaco's Ligue 1 to the Premier League, a move which would make him the most expensive player to join Chelsea in English football. How do Monaco and Chelsea compare? Monaco is a relatively smaller club, but they have done quite well in the market for players in recent years. The French side have signed players such as Radamel Falcao, Joao Moutinho and James Rodriguez to very impressive deals. However, the amount of transfer fees and buyouts he will receive from the English club may force Monaco to sell him immediately if they want to limit the financial damage. However, Falcao could be one player to avoid, as he is a player who will arrive with very little proven success in the English Premier League. Chelsea will find the transition to the Premier League will be difficult to say the least. With a buyout fee of £50 million, there will be financial constraints the club will be in if they wish to sign the player. However, it will be a question mark as to whether the club will be able to find the funds to make the payment. The buyout fee means that the striker will have a huge amount of his salary wiped off his transfer fee. If the transfer does go through and Falcao succeeds in his return to the Premier League, the club would have to pay out £18 million in wages. However, the amount of money on his contract – about £35,000 per week, will see them pay out an amount of about £24 million before tax. This is a huge amount for a team of Chelsea's size. It is understood that

find something to say about the thing you're sitting down to watch. Even if it's just "Nice try, Tez." Some filmmakers have tried to make their movies zippier with limited success, others have gotten more deft. Most of what we're looking at, whether it's the ability to mimic the comic timing of your favorite movies, or approaching cinematography with a desire to have your movie go by like a montage, or any of the other new tricks, can be achieved if you're willing to learn them. There's an echo chamber of course, but when a filmmaker comes out of it, with a movie that's as good as the music or the look of the video game they're trying to make, the idea of having to spend your entire life trapped in the echo chamber will seem kind of small.
