Mohini Bhasmasur is a fictional character who is an enigmatic superhero and a fictional version of a Hindu mythological character. In the film, the character is based on Shiva Bhasmasur, who is an avatar of Shiva in Buddhist and Hindu mythologies.[1] The character is depicted as a strong-willed vampire who fights the evil Kaalratna.The first film on the character was Dhoom (2004). It was followed by Dhoom 2 (2006) and The Vishal Bhardwaj film Maqbool (2007). B. K. Sharma film (2013), and the sixth film in the franchise, Maqbool (2014), is loosely based on the character's story from the film, not the mythology. Babumoshai Bandoobbaaz(2011) Hindi, 2018Tamil, 2017DibbaDabba 2017, 2017 Description: Based on the story of the same name, released in 1989, this movie stars Rajesh Khanna, and Rajinikanth. The movie revolves around two people who learn to love each other through a song "Kahin Mast." (Alt.) The film is being distributed by 20th Century Fox, and the first Indian dub was released in 2007. The film is being rebroadcasted in the UK, and a Hindi dub version in 2016. A.M.T. (2017). Kannada film based on the story of a businessman

The increasing number and variety of functions that are now possible in the context of mobile electronic devices have resulted in these devices now becoming the primary means of interacting with digital data and communications networks. For instance, mobile electronic devices such as digital communication systems, mobile telephones, mobile messaging devices, global positioning systems, navigational devices, and the like, now allow their users to perform an ever-increasing number and variety of functions. These functions are becoming more sophisticated and feature packed, and their growing proliferation and complexity is placing ever-increasing demands on designers and manufacturers of mobile electronic devices. One such common trend within the industry has been the development of mobile electronic devices with ever increasing display capabilities. As a result, the size of display screens provided by mobile electronic devices has increased, and displays have become more responsive to user input. These trends are being driven, in part, by the very nature of mobile electronic devices, which are often only able to accommodate a limited number of input and output components. Moreover, the provision of increasingly powerful and multifunctional displays can result in increased power consumption, increased cost, and a greater likelihood of user dissatisfaction with the performance of the display. As such, there is a trend toward providing increased display quality and responsiveness, but doing so with an acceptable level of power consumption and cost. Oakland Raiders at San Francisco 49ers By Mike Finger, Bay Area News Group Friday, November 1, 2012 Published 4:15 pm, Wednesday, October 31, 2012 Updated 7:26 am, Thursday, November 1, 2012 Though the crowd in San Francisco was small, the scene in Oakland was a little more electric. And the game? Well, it was a great one, complete with signature plays, the Raiders hitting their stride at just the right time and the trademark booming Bart Starr. And Bay Area newspapers had plenty to talk about in the days following the thrilling Super Bowl XLVII title game. Oakland Tribune A San Francisco Chronicle column linked the Raiders' win to the legacy of the late, great George Gipp and held the highest-profile assistant to blame in the defeat. Former NFL head coach and current FOX analyst Jon Gruden was quoted as saying he would be "livid" if Mike McCarthy was not his
