Flickr member nate-at-my-service created this illustration of the history of Photoshop. 20 Years of Photoshop April 29, 2017, marks the twentieth anniversary of Adobe Photoshop. During the year,

Adobe has published a series of anniversary blog posts, offering a behind-the-scenes look at the story of Photoshop over the course of the last two decades. Started in 1991, Photoshop initially cost \$2,000, making it a formidable and expensive image-editing program. In 1991, the world wide web

wasn't yet a reality and your best camera might not include a viewfinder. The earliest Photoshop users weren't even familiar with the term "photo editing." It wasn't until 1993 that Photoshop had finally graduated to a public beta version, available for free download from its companion

website. Four years later, in 1997, Photoshop was finally released on its own website. Immediately there were big changes -- a more intuitive user interface, improved image-processing capabilities, and a host of other new features. The program was easily accessible, and now you could edit photos

without having to wait for a film crew. Photoshop quickly became the tool of choice for professional photographers, graphic designers, and other artists. The transition from newsletter to PDF By the year 2000, Adobe had made a drastic change in the way it managed Photoshop's

newsletter. Previously, a monthly newsletter for registered users had been distributed by regular post, but starting in 2000, the Photoshop newsletter would be distributed by electronic means. This PDF distribution greatly expedited the process of delivering a newsletter to registered users.

Photoshop users would also begin receiving updates for the program via electronic mail. It wasn't until September of 2000 that the first version of Photoshop Photo Book was made available for download, giving Photoshop photographers an easy-to-manage gallery of images in a

downloadable format.

Photographers could now send their galleries to friends or institutions. In the years that followed, Photoshop continued to grow, offering more tools and increasing in power. In 2001, the initial Photoshop CS version was released. In 2002, Photoshop CS became

available in a beta for the Macintosh platform. The program then gained support for 32-bit color and received major improvements. In 2003, the price of Photoshop CS was reduced from \$2,000 to \$700. Photoshop continued to grow in power and sophistication. After a period of stability, the

program suffered a major malware attack in 2007. The attack resulted in a serious security vulnerability that

Mechanistic study of Ag⁺-ZnO nanocomposite in visible-light photo-degradation of phenol. The processes of formation, degradation and mineralization of phenol using Ag(+)-ZnO nanocomposite as a visible-

light photocatalyst under simulated solar light irradiation have been studied. The intermediates formed during the photocatalysis were identified by using gas chromatography-mass spectrometry (GC-MS) as well as liquid chromatography-electrospray ionization mass

spectrometry (LC-ESI-MS) techniques. It was found that the Ag(+)-ZnO nanocomposite photocatalyst can effectively degrade phenol in aquatic solution. The complete mineralization of phenol is observed when the photocatalyst is irradiated with visible-light ($\lambda > 400$ nm). The

analysis of the intermediates formed during the photocatalytic reaction has been carried out by GC-MS and LC-ESI-MS studies. The intermediates formed during the photocatalysis of phenol are identified as nitrite, chlorate, nitrobenzene and CO₂. Vauliina Vauliina is a rare Finnish name

of uncertain origin. It is thought to derive from vau (wave) and Finnish iniina (a suffix indicating a female) and may refer to: Pertti Vauliina (1884–1931), Finnish poet Sanna Vauliina (born 1977), Finnish singer, former member of Russian pop group Nuorukas See also Vau (surname) Ulla

investigated, using spectroscopy. Changes in chlorophyll fluorescence parameters, high-resolution transient absorption spectroscopy and electron paramagnetic resonance (EPR) spectroscopy were used to determine the toxicity, cellular damage, oxidative stress and

the levels of active oxygen species. The results obtained showed that NIV caused damage to the plastoglob

Search We are hearing a lot about the loss of what makes being part of a church

community what it is supposed to be. We hear about the “pulpits” coming to the fore and what a potentially deadly threat they are to the life of the church and how they would be better away. And then we hear about the necessity of change to “Revitalise the church”. And though we profess to value

change as something positive, it's something we are often quite bad at. Life in this world is change. It is something that we refuse to understand and yet have to embrace. It is so natural that, out of necessity, we will move and change in order to survive. It's life as it is. It's not so easy to help our children

deal with life change when it comes. And as they move through their own lives, it's going to come up. The whole of life is about coming to grips with the fact that we are going to move, and that we will do so with the inevitability of change. So what are we doing with our church when faced with this?

We have to give up control. We have to let go. We have to trust – and more than that, when we are willing to let go. This is why, quite often, I find myself saying “I don’t know”. The difference between a church leader and a dad is that, as a dad, if I don’t know, I’ll stop and ask the kids. At church, I

don't ask. I'll admit that I don't know and ask the Spirit to direct the way. I don't know what will happen. And that's good. This doesn't mean I don't try to figure out what will happen. There's no point. I'll ask my wife, or my friends, or my children or my pastor. None of them know everything.

They simply know what God has shown them and what they've seen work. So when you ask your pastor what God is saying, or when you talk to a friend about what God is doing, their answer may just be your answer. God doesn't tell us the steps he's
