What's New In Librevault?

Librevault is a lightweight application for sharing and synchronizing files between several devices. It is designed to support simple file sharing between computers, mobile devices, and cloud storage services, such as Google Drive and SkyDrive. It lets you share, synchronize, or transfer files and folders easily between multiple devices in a secure, efficient way, and you can apply unique and advanced synchronization options to suit your individual needs. File sharing and synchronization between a single computer, multiple computers, mobile devices, and cloud storage services are achieved by sharing public folder via different servers (WAN/LAN) or access to shared folders via network. Possible data transfers in the sharing process are limited to access permissions, file modification, file deletion, and file creation. You can also choose your preferred encryption type by ticking the "Encrypted copy" option. Additional features of this application

include the following: - Optimized for Windows XP, Vista, 7, 8, 8.1 and 10 - Easy to use and launch in a minute - No additional user configuring needed - No need to synchronize files to a cloud storage service - Automatic network checking - Web browser interface - User-friendly - Easy to share and synchronize files to a computer, mobile device and cloud storage service - Easy to enable/disable WAN connections - Simple configuration
