investigate self-management practices of asthmatic children and teenagers and to identify their attitudes towards their illness. A cross-sectional postal questionnaire survey was conducted of 124 children and teens (4-17 years old) and adolescents (12-17 years old) from whom permission to approach their parents had been given. The questionnaires used were the Asthma Self-Assessment Scale and the Behaviour Scale of the Children's Sleep Habits Questionnaire. Other parts of the questionnaire contained questions on patient

education, frequency of missed school days, a forced expiratory volume in 1 s, and an asthma-specific quality of life scale. Seventy-two patients (58%) completed the questionnaire. Of these, 36 (50%) had received no instruction on correct management of their illness, and 22 patients (32%) had never been told how to manage their asthma. The majority of patients had a positive attitude towards their illness (71%). The Behaviour score in the Children's Sleep Habits Questionnaire showed that the majority of patients

(75%) slept well or moderately well. Only 28% of patients attended the outpatient clinic regularly. Only 5% of patients had previous experience of an asthma attack. Most patients thought that their health was not worsening, and this attitude was associated with having had at least one previous asthma attack (p

#### **DWF To DWG Converter**

DWF DWF Converter is an AutoCAD Addin that is used to import DWG files into DWF format. You can import dwf

---

files into autocad and use them to publish drawings to the Internet. With this tool you can import dwf files into autocad and use them to publish drawings to the Internet. You can also do many more things with DWF files. The import to DWF option allows you to import one or multiple drawings. You can use this addin in the following ways: 1) You can select a folder, and import all dwf files in the selected folder. 2) You can import dwf files automatically by using import dwf files through command line. 3) You can select the files

---

to import in the list. 4) You can import one file at a time. 5) You can import multiple files at a time. 6) You can import DWG files directly from Explorer. 7) You can import a simple or a complex drawing. 8) You can export an selected file as DWF. 9) You can specify the output DWF format. If you do not import by selecting one file at a time then when you import the tool selects the files you wish to be imported. You can select the format of the DWF and DWF2 file. Creating a DWF from DWG files is a simple process. You will need to select one or

---

multiple DWG files (or.dwg files from a folder), and then export them to DWF. This tool allows you to export the files in the folder to DWF. There are a number of options you can choose from. You can add your comments (most of the options have a drop down list). You can select all the files or just specific files and its dimensions from the folder that you have selected. You can add an tag and assign a specific tag to a file you want. You can select either Filled Shading Model (for 2D objects). For 3D objects, you can select Solid or Wireframe

---

Model. You can select the type of fill for the selected objects (for the 3D objects). With this tool you can make multiple changes to the file once you export it. You can modify the dimensions, position and other things. The DWF file created with this tool is ready to be viewed with AutoCAD. You can
