Playable in Career Mode or as a standalone game, the Ultimate Team mode lets you assemble the world's best Ultimate Teams of real footballers. Create and manage your very own dream team from over 350 players, all with distinct playing styles. And when it comes to gameplay, there's more of the unpredictable things that define football than ever, everything from the choices of an instant-reaction playmaker to the need to adapt your tactic to the conditions as the game evolves.

FUT Teammate Cards – Fight for that Ball and Make the Right Choice to Win the Game! There are a variety of key cards that can be earned through gameplay in FUT, some of which are earned automatically from FUT Mode, and some which have to be earned in Career Mode, including cards that affect your team mates, the match, and your cards in general. The most powerful cards can be gained by upgrading your card collection or to unlock via the loot box system.

Career Mode – Take over as an ambitious junior at a club that you can either follow your dream of becoming a professional footballer, or a Vice President, a head coach, or an agent that manages all of them. In Career Mode, your job is to improve your players' quality, develop a winning squad, and guide them to glory.

Manager & Player cards – What are player cards? Each player in FIFA is composed of three different cards, each of them affecting the player in its own way:

- The player card that represents their basic attributes.
- The position card with its own unique abilities in the pitch and off it.
- The owner card that can increase their stats or unlock traits.

Management Total Football – FIFA 22 delivers the most authentic football experience on a console, that captures real football behaviours and the fluidity of the pitch to deliver Total Football. Every aspect of the game is influenced by FIFA 20, from the way players tackle and tackle-tackle to the way the game is played in the heat of the moment. Huge improvements on ball physics, controls, and tackling makes the game fluid and spontaneous. Goals are dynamic and responsive, leaving no doubt as to who is the centre of attention. The second part of the Total Football experience, Decision Making, highlights the need for players to adapt their approach to the team environment and make the right choice to win the game.
