With a single click, you can check the image quality and preview every.pdf file.The stomach is the most important organ in maintaining the animal through which it extracts the proteins, carbohydrates and lipids to support the body. It is therefore no surprise that many drugs for the treatment of diseases, e.g., gastric ulcer and gastritis as well as inflammatory bowel disease, affect the stomach, by acting on its cells. Most of the current treatments that can be used to combat stomach disorders are based on the inhibition of gastric acid secretion, which can be either gastric acid secretion that normally occurs in the stomach or duodenal acid secretion that normally occurs in the duodenum and upper small intestine. The gastric acid inhibition can be generally divided into two groups: proton pump inhibitors (PPIs), which target the proton pump $H+/K+$ adenosine triphosphatase ($H+/K+$ ATPase) on the surface of the stomach cells and are represented by omeprazole (1), esomeprazole, lansoprazole, pantoprazole, rabeprazole and the like. The second group is H2 receptor antagonists, such as ranitidine (2), cimetidine (3), nizatidine and the like. The present invention relates to the use of certain selected bioactive agents that can be used to treat the above mentioned gastric disorders. One group of agents that has been proposed for use in the treatment of disorders of the stomach or duodenum are those that counteract the effects of bile acids. Thus, bile acids may be implicated in stomach disorders, for example, by playing a role in the pathogenesis of duodenal ulceration or gastric ulcers. The use of bile acid derivatives, e.g., ursodeoxycholic acid and glycine salt of chenodeoxycholic acid is disclosed in WO 01/75268, to reduce duodenal ulceration. It has also been proposed to administer bile acid derivatives to patients with gastric ulcer (WO 93/22000). Generally, bile acids are either steroidal molecules in which the carbon

Wildlife Service removes its poachers' signThe Federal government agency charged with protecting American fauna removed a decades-old sign in Washington State.Wes Hannaweathernationalwashingtonwildlife serviceWMNFNational News03:22Appetite for life, or run-of-the-mill (?) Hello everyone, I have an easy easy vegetarian recipe that you can make tonight. I can't believe I haven't posted this recipe before. I keep feeling that I should, but my husband wants me to create more meat dishes, and this is a kind of easy vegetarian meal. I actually found this recipe from a Japanese magazine that I got online awhile back, and I can't recall the name. While it was vegetarian, I substituted beef broth for the chicken broth. My husband liked it, but he always likes it when I adapt recipes. This one is really quick and easy, and it does take 2 days to make, but it's a pretty easy dish. Appetite for life, or run-of-the-mill (?) Directions Make the stock In a medium stock pot, heat the oil and saute the bay leaves. Add all the vegetables, and cover the pot. Saute over high heat until the vegetables are soft and have started to turn golden. Strain the vegetables through a fine mesh strainer and
