Joint Photographic Experts Group (JPEG) is an ISO International Standard for still image compression and the most widely used image format in the world. JPEG is also an open standard, and all the code and information is freely available to anyone who wishes to implement and use it. JPEG is a state-of-the-art, standardized data compression method. It allows images to be stored in a compact form, and compressed images can be decompressed rapidly using a common processing device, such as a personal computer (PC), as they are accessed by the user. The main advantage of JPEG is its simplicity and speed. It is optimized to compress full-color RGB images efficiently, so it has wide acceptance and is used by the majority of commercial software packages and hardware devices. JPEG also provides fast decompression with reasonable quality. It should be noted that JPEG encodes are called lossless, but the lossy parts in the encoding process may cause compression artifacts. JPEG is a lossy format. To overcome the lossy parts, JPEG2000 is promoted as a new standard for image compression. The current standard of JPEG is incorporated by reference and described in detail in many U.S. patents and other references, such as in U.S. Pat. Nos. 4,811,434; 4,873,678; 5,315,467; 5,315,468; 5,343,393; 5,426,376; 5,461,426; 5,497,441; 5,621,670; 5,634,853; and 6,018,789. The JPEG format is described in, for example, ISO/IEC 10918-1:1996(E), "Information technology—Digital

Open theA .There are few parts of immigration reform in the United States as hot as the border crossing between the United States and Mexico. The wall that US President Donald Trump wants to build along the border is part of a current movement to secure the southern frontier. After the wall, the US government would deport migrants and the country would turn them back. For many, the border is a problem that needs to be dealt with, one way or another. While the majority of Americans are in favor of the current immigration system in the United States, there is a majority of Americans who believe the current system needs to be revamped. The border has been a focal point of immigration debate in the United States for many years. Laws concerning immigration were made at the time of the Chinese Exclusion Act, which took effect in 1882. The act banned all Chinese immigrants from entering the country. New laws, such as the Hart-Cellar Act and the McCarran Act of 1952, were made to bolster immigration laws. The Immigration and Nationality Act
