What's New In?

To get to know this small and convenient utility better, read its official description below. Check Yahoo! Status Description: Check Yahoo! Status is a small and handy utility which shows whether your friends' Yahoo IDs are active or not. It's effective, extremely fast and you won't need to be connected to the Internet to use it. It works by checking whether you still can connect to Yahoo! Messenger with your Yahoo ID. There are two ways to check this status. You can check it directly or you can set a check interval. Checking if a Yahoo ID is active on the Internet is an easy task. However, in certain circumstances, it's necessary to check your Yahoo ID every few minutes to be absolutely sure it's actually online. Check Yahoo! Status is designed in this way. You can set the interval for checking Yahoo ID status every minutes, half an hour, hour, day or week and, once it's time, Check Yahoo! Status will send you the status report with the active ID. If it's possible to connect to your Yahoo ID on the Internet, Check Yahoo! Status will show this status. If you can't connect to your Yahoo ID on the Internet, it won't be displayed. Checking the status of your Yahoo ID every few minutes may be enough if you use it to connect to your friends who have offline accounts, but if you'd like to be absolutely sure whether your friends' are online or not, you need to set the time interval for checking their status. If you'd like to check the status of your friends' Yahoo IDs on your computer, you need to download Check Yahoo! Status. Download Free Version Although the application is free, you may download the free version to check whether you can connect to your online and offline friends' Yahoo IDs or not. You also have the possibility to check history. Check history is a convenient feature that's actually useful because you can manage all the last status reports you've sent. Moreover, you can delete all the history for an ID whenever you wish. Download Standard Version Although the free version of Check Yahoo! Status is very useful, it's definitely missing important features. In this respect, Standard Version is the right choice. It enables you to check the online status of your offline friends' Yahoo IDs and displays an interval for all the checked ID. You can select between 10, 30, 60 or 120 minutes to check the status. The tool can check your online and offline friends
