Some of the changes made in the game are simply a matter of polishing and improving certain play mechanics. For example, when receiving a pass in a sudden-death situation, the player can now choose between rolling the ball between his legs to evade contact or firing it forward to try to deliver a high-percentage shot. Changes have also been made to the flow of game play. For example, diving for a loose ball and heading it across the box to create a chance for a shot are now given special attention. FIFA 20 introduced new player faces, atmospheres, and visuals that show off the next generation of technology and graphics the world is poised for. A whole new depth of emotion is added for the joy of realizing the beautiful game you once thought only you could enjoy. The face animations, new body postures and new leaping animations take your favorite players and ensure you have a whole new generation of player faces. Bringing the change to the new generation of fans are the completely rebuilt stadiums; including the introduction of new stadium atmospheres, stadium ambiences, and the soundscape. Along with a completely rebuilt stadium, FIFA 20 introduces player customization, allowing the user to bring all the stadiums to life. And the game keeps the award-winning gameplay the series is known for, introducing new game modes and content for play, including the introduction of a new Career Mode. In the last quarter of 2013, fans were given an early opportunity to download and play the game ahead of its official release date, December 3rd, 2013. From then on, they could create an online player and socialize with their friends on social media, sharing which player they created, along with their favorite stadiums, team, and player. FIFA 20 also marks the beginning of community content development on FIFA Interactive Network. FIFA (from FIFA and video games) is an annual series of association football video games published by EA Sports, or Electronic Arts, since its first game. It is one of the best-selling sports video games of all time with FIFA being the best selling football game of all time, with sales of over 32 million copies. Since the release of FIFA 99, the first game to feature the brand name, EA Sports has continued to add and expand the game and format, as well as make improvements and innovations to the gameplay and features. The first iteration of the series, FUT 94, was released for the Super Nintendo Entertainment System (SNES) and Sega Genesis in 1994. The series was expanded and relaunched when EA Sports and SEGA released FIFA Soccer 96, which was the first FIFA game to feature licensed players, teams and competitions, and included an all-new career mode. The game was followed by FIFA 97, the first official version of the game to be released for the Sega Pippin. FIFA 98 was one of the first games to use the industry standard EASI scanner. It also introduced the "Injury" mechanic, in which shots of the ball and goals could cause players to go down injured. The game was the first to have a transfer system, in which players would be bought and sold on the market. As of 2002 FIFA 99 has sold 13 million copies. Since then, a total of 21 video games have been released. The most recent game, FIFA 2010 for the PlayStation 3, was released in October 2009. The World Cup game from the 2006 FIFA World Cup was the best-selling video game of all time until the release of FIFA 19, which was released in September 2018. For each title, EA Sports' development and design teams work closely with international soccer governing body, FIFA, to ensure the game accurately reflects the sport, including the rules of the game and the techniques used by the world's top players.
