Players can be used to create and share Player Motion Channels – still images or video sequences composed of hundreds of player motions captured in motion and set to music. The player motion channels become specialised channels shared on the EA SPORTS Football Club social network as players can be tagged in the videos. Video showcases Player Motion Channels Players can also be used to create Player Motion Channels where their movements are projected onto a player’s virtual avatar and edited into a video sequence. This process can be done on the FIFA Online Club, which is an online community where a player can create and manage their own online club in FIFA 22. FIFA U19 World Cup 2019 Next year's FIFA 19 features even more game modes and features including a FIFA U19 World Cup. EA SPORTS has made World Cup Kits and Stadiums available for download from the FIFA U19 World Cup App to create the perfect, authentic-looking environments to play against. In the multiplayer mode, players will be able to select their national team and take on other teams who have previously made FIFA 19 kits available in the FIFA 19 App.

Q: Do while loop and increments in the loop I have the following code: `$max = 10; while ($lst = mysql_fetch_array($rs)) { echo $lst['data']; $i = $lst['m_name']; if ($i > $max) { $max = $i; } echo "";` Basically it is a list of products and I sort it by name. It's working perfect. I also have 3 products in the sample (like `$lst['m_name']`). The problem is that 2 of these products are the same (`$i = 3`) and 2 others products are the same too (`$i = 6`). I would like to get the 10 products but in PHP this always it's the last of this while loop. I can't get how to fix it. Can you please help me?

A: You could use a while statement. `$max = 10; $sql = "SELECT * FROM your_table ORDER BY m_name ASC"; $rs = mysql_query($sql) or die(mysql_error());`
