the shadows are still the most dangerous for their quick and unexpected attacks, and should be avoided. the edges of the abyss are the safest, but their attacks are slower and less frequent. the floor is the safest, but you have to worry about the axe, the hammers and the acid. you will come across upper abyss and lower abyss pits that are enemies of the abyss's. each pit has a different strategy for defeating it. the uma has no real strategy, but its attacks are more powerful and have less range than the abyss's. the uma is very vulnerable to attack from above, so if you can keep it away from the top of the abyss, it is a good idea. the uma can be defeated from the bottom, but its attacks are very slow and they need to be attacked in succession. with the abyss protecting you, it is possible to do things that would normally be impossible. in many of the later fights, the abyss has to leave your side to deal with a tougher foe, but he has the power to come back to your side quickly enough to save you from almost anything. despite his power, the abyss will need you to show him how you defeated his opponent. as he takes in the strength of your attack, you can see his body begin to grow. once the growth has reached its limit, you will see his

body begin to change. in the first fight, his skin turns to a dark blue color. it is during this time that he begins to glow with power, which is what you need to help you find the path to the abyss. after you leave the abyss, you will be free to look around and explore the caverns.
