right now, you can get windows phone 8 s on any network, and its one of the best phones you can find in the market. but, is it actually usable? windows phone 8 s is good at last messaging, emailing and organizing folders. but there are

still issues. it's not worth it. at all. today, 20 million windows phone users are faced with a tough decision. do they stay with the windows phone 8 platform, or move to another, smaller market with a cheaper device. no matter what they decide, windows phone users must always make it a

priority to p.. it has been stated that html5 is the future of the web, and could also be seen as the future of the mobile web. the world of mobile apps is so saturated and the features of a browser have become so advanced that it's time to bring html5 to mobile too. the html5 working group has

published "html5 data interfaces for forms and text input controls"[1], a specification to provide a way for screen readers, keyboard input, and input methods to work with all modern, compliant uas. the spec was started as "html5 form validation" [2] by ui champion and ui
